

# *“Docks For Doc”*

*One of David’s last great ideas was to have the Platteville Community Arboretum develop wheelchair accessible locations for trout fishing along Platteville’s Rountree Branch. The idea came when David (or “Doc” as he was affectionately known) was recently in a wheelchair. He believed such a project would allow more of the community to share his passion for fishing.*

*The project became known as “Docks for Doc” in his honor. Currently the feasibility and requirements of such a project are being explored.*

*All donations to PCA in memory of David will go toward realizing projects like “Docks for Doc”.*
